11/2, 1959.

Dear Esther and Josh.

How are you in the new settlement?

Thank you very much for the photos. We certainly enjoyed them, especially the big one with both of you.

I guess that you have already received the two sera, W1611F<sup>+</sup> and W3703Hfr. They contain 1% chloroform and 0,1<sup>o</sup>/oo merthiolate. If you think it necessary add once again one or both constituents in the same percentage. We are anxious to hear whether you will find the sera useful or not. If you don't mind, and can spend the time, we will ask you to go through our F paper, which will be finished in a short time, we hope. We will write later about that.

The wall decoration is almost on its way, 'how is it with our joined paper?

Best regards

*Ida*

Ida.

*P.S. For agglutination purpose we use the sera diluted 1/10 in phenol-saline 0,25%.*
